## **CARE INSTRUCTIONS**

Your recently purchased ProKnee COVID-19 Face Shield is made from a highly durable, long lasting Lexan Polycarbonate. This material is virtually unbreakable, however, the Lexan will scratch more easily than glass if not cared for properly. Please read through the following to ensure proper care is taken to extend the long term use of your shield.

Wash Lexan shield with a mild soap or detergent (e.g., Joy/ Dawn/Palmolive dishwashing liquid) and lukewarm water using a clean sponge or a soft cloth. Rinse well with clean water. Dry thoroughly with air hand dryer, a chamois or moist cellulose sponge to prevent water spots. All of the headgear (ie. poly woven elastic head strap, plastic Smartlock buckle and optional grey wick guard/sweat band) can be washed in the same manner.

#### TIPS

Don't use a dry cloth to clean your Lexan shield. This will only lead to scratches.
DO use Brillianize or Novus #1 (known for their performance and anti-static properties) with a soft lint free cloth to remove everyday dust and dirt. (These cleaning solutions do not contain any antibacterial properties, so we recommend dishwashing soap for that.)

•Frequent use of common household solvents (such as Lysol, Pinesol & Isopropanol alcohol) may damage polycarbonate and shorten the long term use of this product. •Don't use ammonia based glass cleaners, such as Windex.

•Don't use abrasives or high alkaline cleaners, such as Simple Green.

Don't use cleaners in direct sunlight or at elevated temperatures as this can lead to staining.
Don't leave cleaners on surface for long periods of time, wash immediately.

•Don't use scrapers, squeegees or razors.

•NEVER use a dry cloth or your hand to clean your polycarbonate as this rubs the dirt and dust INTO the polycarbonate as much as it rubs it OFF.
